Greenyard Logistics Poland expands cold chain network with new logistics hub in Gliwice, Poland.

Sint-Katelijne-Waver / Gliwice, Belgium / Poland, 16 November 2026

Greenyard Logistics Poland, part of the Greenyard Group - a global leader in fresh, frozen, and prepared fruits and vegetables - has officially opened a new logistics hub at the Marq Logistics Gliwice II in Poland to meet the growing demand for advanced, temperature-controlled logistics across Poland and Central Europe. The new facility operates as a complete one-stop shop that handles receipt, flash-freezing, storage, and distribution preparation under one roof. This integrated approach reduces both transport operations while eliminating risks to the cold food chain.

Greenyard Logistics Poland's new site covers nearly 12 000m^2 of the 58 000 m^2 Marq Logistics Gliwice II complex, which was developed in partnership with Merity Funds and general contractor BREMER Polska. The complex is strategically positioned near Gliwice-Sośnica junction, the intersection of the A1 and A4 motorways. This allows for quick and easy access across Poland and its borders to the Czech Republic, Slovakia, and broader Central European markets.

"Our new Gliwice site perfectly complements our facilities in Gdańsk, Poznań, and Warsaw, into a robust, nationwide international distribution network. For our retail and food industry customers, this means guaranteed product availability, shorter supply chains, lower distribution costs, and flexibility during peak seasonal harvests," states Radosław Nowak, Managing Director at Greenyard Poland Logistics.

The facility is equipped with the latest technological infrastructure designed to protect texture, taste, and nutritional value. It features three flash-freezing chambers, high-performance insulated suspended ceilings, and an ammonia-glycol refrigeration system with integrated air dehumidification. The project has been developed in line with BREEAM Excellence certification requirements, reflecting the high sustainability standards incorporated into its development.

"We are delighted to welcome Greenyard to Marq Logistics Gliwice II. Their new facility is a great example of how we work closely with our customers to deliver tailored solutions for even the most specialised logistics operations," says Jarosław Czechowicz, Country Manager Poland at Marq Logistics.

With a total capacity of 22 000 pallet spaces, the new hub utilizes mobile racking systems to maximize storage possibilities, dedicated polyblock de-stacking zones, and a Warehouse Management System (WMS) for real-time inventory tracking.

The site also provides value-added co-packing services, including customised packaging, labelling and promotional assembly, enabling Greenyard Polands Logistics' customers to combine cold storage and product preparation within a single logistics operation.

Key figures

- 40 employees
- 12 000m^2 site
- 22 000 pallet space capacity
- 800 kWp rooftop photovoltaic installation
- Column-free docking area with a docking bay depth of 24m
