

Press release
10 April 2024

With the mosaHYc project, ENGIE has reached the first milestone in its goal of building 700 km of hydrogen transport networks in Europe by 2030.

- **ENGIE Group is delighted to announce the launch of mosaHYc – a cross-border project for the conversion of gas pipelines to transport hydrogen between France and Germany.**
- **GRTgaz, owned with Caisse des Dépôts (60% / 40%), has announced the final investment decision for the 90 km renewable or low-carbon hydrogen network project with its partner CREOS Deutschland.**
- **mosaHYc will connect the Greater Eastern region (France) to Saarland (Germany) and the border with Luxembourg.**

mosaHYc is a ~90 km cross-border hydrogen pipeline project with Germany. It represents a total investment of €110 million, of which €40 million will be borne by GRTgaz.

GRTgaz, an independent subsidiary of the ENGIE group, is managing the French section of this project (50 km, of which 45 km will be converted pipeline located in the Moselle region), and CREOS Deutschland will be developing the German section (in Saarland) – some 40 km. It will interconnect the towns of Völklingen, Perl (Saarland), Bouzonville, Carling and Saint Avold (Moselle).

The first client will be the Saarland-based steelmaking site in Dillingen operated by RoheisenGessellscha Saar SHS (Stahl Holding Saar group), in Germany.

The final investment decision enables the launch of the administrative authorizations phase, followed by the construction and network conversion phase, with commissioning scheduled for 2027.

The mosaHYc project will contribute to these regions' economic and industrial appeal, while at the same time helping them to meet their decarbonisation targets for industry and mobility.

" The mosaHYc project has a strategic value as the first Franco-German link, paving the way for the development of a wider European hydrogen network. This project will accelerate the development of a renewable, low-carbon hydrogen market in Europe. It also contributes to our goal of 700 km of hydrogen-dedicated transport networks by 2030. " said **Cécile Prévieu, ENGIE Executive Vice President in charge of Networks activities.**

About ENGIE

ENGIE is a global reference in low-carbon energy and services. With its 97,000 employees, clients, partners and stakeholders, the Group strives every day to accelerate the transition towards a carbon-neutral economy, through reduced energy consumption and more environmentally friendly solutions. Inspired by its purpose statement, ENGIE reconciles economic performance with a positive impact on people and the planet, building on its key businesses (gas, renewable energy, services) to offer competitive solutions to its clients.

Turnover in 2023: €82.6 billion. The Group is listed on the Paris and Brussels stock exchanges (ENGI) and is represented in the main financial indices (CAC 40, Euronext 100, FTSE Euro 100, MSCI Europe) and non-financial indices (DJSI World, Euronext Vigeo Eiris - Europe 120 / France 20, MSCI EMU ESG screened, MSCI EUROPE ESG Universal Select, Stoxx Europe 600 ESG-X).
