

## **Kapsch TrafficCom selects TomTom Traffic to enhance its global traffic management solutions**

**Amsterdam, Netherlands, 11 March 2026** – TomTom ([TOM2](#)), the specialist in mapping and location technology, today announced that Kapsch TrafficCom ([KTCG](#)), a global leader in traffic management and tolling solutions, has selected TomTom Traffic to power the next generation of its intelligent mobility offerings. By integrating TomTom's advanced traffic data and services, Kapsch TrafficCom will expand and strengthen its end-to-end portfolio, enabling public authorities and road operators worldwide to make more accurate, data-driven decisions.

Through the partnership, Kapsch TrafficCom will integrate TomTom's Floating Car Data (FCD) and traffic services directly into its EcoTrafiX Platform, an end-to-end traffic management system trusted by cities and road authorities worldwide. This integration provides users with immediate access to rich, real-time insights, including traffic flow, incidents, congestion patterns, travel times, and multimodal movement. This seamless integration eliminates the need for project-by-project customization or additional hardware, reducing deployment complexity and accelerating time to value.

The partnership significantly broadens Kapsch TrafficCom's portfolio, enhancing its ability to deliver more powerful, data-driven mobility solutions. With richer insights and more precise traffic information built in, Kapsch TrafficCom can help its customers achieve smarter, safer, and more efficient mobility across their road networks.

"We are delighted about this partnership with TomTom, a leading traffic data provider," said Samuel Kapsch, Chief Operating Officer, Kapsch TrafficCom. "Data is making a real difference in combatting congestion, because it allows cities to better understand the impact of their actions on their mobility ecosystem. With this partnership, we are giving them real-time insights into their streets so they can ensure that mobility is accessible to everyone."

"Cities and road operators increasingly need immediate, data-rich insights to keep people and goods moving safely and efficiently," said Mike Schoofs, Chief Revenue Officer, TomTom. "We're excited to partner with Kapsch TrafficCom and power their solutions with our industry-leading traffic data. By combining our traffic intelligence with Kapsch TrafficCom's platform, we enable cities and road authorities to make faster, smarter, and more sustainable decisions."

At Intertraffic 2026, Kapsch TrafficCom will present the enhanced EcoTrafiX Platform capabilities, including TomTom-powered live traffic and analytics services. Attendees will have the opportunity to

experience live demonstrations and learn more about how the partnership enables smarter, data-driven mobility management.
