

# Materialise and SYNEX Deliver All-in-One 3D Printing Package for Large Scale Manufacturing

Special package bundles Materialise software with HP printers for streamlined procurement and operation.

**FRANKFURT, GERMANY– Nov. 16, 2017.** Materialise, a global leader in 3D printing, and SYNEX, the exclusive distributor for HP Jet Fusion 3D in the U.S. and Canada, have signed an agreement that will deliver a complete 3D printing package for large scale 3D printing operations.

"This partnership is a win for the 3D printing industry in making technology easier to acquire for manufacturers," said Bryan Crutchfield, Vice President and General Manager Materialise North America. "SYNEX customers will now have easy access to Materialise's software, the backbone of the industry, to optimize their 3D printing operations. The agreement will also streamline the sales process for customers seeking to purchase a complete 3D printing solution for their manufacturing needs."

This new agreement will allow SYNEX to sell Materialise software bundled with HP Multi Jet Fusion printers, providing multiple benefits for the end user. Having a one-stop solution to purchase both Materialise software and HP printers enables users to take full control of their 3D printing process from data preparation through production of a quality 3D printed part. It also gives customers access to the Materialise HP Build Processor, which provides a seamless integration between the Materialise Magics 3D Print Suite for data preparation, and the HP Jet Fusion 3D printer.

"This strategic relationship with Materialise allows SYNEX to provide the critical production software element for our authorized HP 3D Multi Jet Fusion resellers, making SYNEX the complete solutions provider in high-growth additive 3D print markets," said Scott Barker, Senior Vice President, PRINT Solr Wide Format, SYNEX Corporation. "SYNEX is excited to join with Materialise in solving the 3D printing puzzle for resellers ready to capitalize on additive 3D print solutions for manufacturing and production."

With 27 years of experience, Materialise has become the partner of choice for companies interested in the benefits of 3D printing, always there to move the industry forward. Global partners rely on Materialise's technical expertise and neutral technology to implement end-to-end solutions for their customers.

For more information about Materialise 3D printing solutions and the SYNEX partnership visit booth #C48 during the formnext conference, held November 14-17 in Frankfurt, Germany or visit <http://www.materialise.com/en/events/corporate/formnext>.

## About Materialise

Materialise incorporates 27 years of 3D printing experience into a range of software solutions and 3D printing services, which together form the backbone of the 3D printing industry. Materialise's open and flexible solutions enable players in a wide variety of industries, including healthcare, automotive, aerospace, art and design, and consumer goods, to build innovative 3D printing applications that aim to make the world a better and healthier place. Headquartered in Belgium, with branches worldwide, Materialise combines the largest group of software developers in the industry with one of the largest 3D printing facilities in the world.
