

Technische Analysedag

Gent

24 februari 2018

Divergentie: Basisbegrip in Technische Analyse

Definitie: koersbeweging en afgeleide grafiek evolueren in tegengestelde richting

Gewone beweging:

koers STIJGT >>> indicator STIJGT

Koers DAALT >>> indicator DAALT

Koers DAALT >>> indicator DAALT

Koers piekt of maakt bodem >>> indicator piekt of maakt bodem

Soms: géén bevestiging in indicator maar tegengestelde beweging aan de bodem = **positieve divergentie** (bullish divergence)

... of (aan de top) **negatieve divergentie** (bearish divergence)

positieve (bullish divergence) en negatieve divergentie (bearish divergence)

Belang?

Divergentie is een **waarschuwingssignaal**
is geen noodstop
is geen aan-/verkoopssignaal

De koers zelf moet het signaal bevestigen

Ook op WEEKbasis:

en op MAANDbasis

Ook zichtbaar in korte timeframes

Klassieke Divergentie in stijgende trend (= HH en HL)

→→ zoek naar dalende **toppen** (LH) in de indicator

Klassieke Divergentie in dalende trend

→→ zoek naar hogere **bodems** (HL) in de indicator

Verborgen divergentie (hidden divergence)

= het omgekeerde van de klassieke principes

In Uptrend HIGHER Lows in de koers maar LOWER Lows in de indicator

Verborgen divergentie - (hidden divergence)

In Downtrend *Lagere toppen* in de koers maar *Hogere toppen* in de indicator

- Hidden divergence kondigt meestal een voortzetting van de trend aan
- Hidden divergence komt voor in alle markten (aandelen – commodities – bonds)

Linde Ag

Infineon Technologies Ag

Ishares Barclays 20+ Yr Treasury Bond Fund

Mtl Gold - 24h

Hidden divergence komt in alle time frames voor

Hidden divergence komt in alle time frames voor

Hidden divergence komt in verschillende indicatoren voor : macd - stoch - rsi

Klassieke divergentie → niet in elke chart, niet in elke indicator

Hidden divergence → idem: soms *niet* in indicator A maar *wel* in indicator B

HD zichtbaar → kans op extra winst of goed instappunt

Aandelen recent nog met HD:

- MT (Arcelor M.) (Macd)
- BPOST
- KBC (Stochastics)
- ATO (Macd – Stoch.)
- CS (Axa)
- LR (Legrand)
- SAN (Sanofi) (Macd)
- AC (Accor) (Rsi)

Einde Deel I Verborgen Divergentie

DEEL II - MOMENTUM

- **Wat?** • De snelheid (%) waarmee de koers verandert over bepaalde periode

- Momentum is het verschijnsel dat aandelen die winnaars waren tijdens de recentste periode, ook nog een tijd winnaars blijven (outperformance)

- **Relatieve Sterkte (RS):** - vergelijkt de onderlinge sterkte van een aantal waarden
- ordening in percentielen

RS Galapagos: **100**
(beter dan alle andere)

Momentum Galapagos: **0**
(Geen vooruitgang)

Is Momentum 'speciaal'?

➤ Prof. **Eugene Fama** (Efficiënte Markt Hypothese)

→ “momentum is the premier market anomaly”

→ “it is the biggest embarrassment to the theory”

→ “several studies have confirmed that momentum investing works embarrassingly well”

Waarom zijn 'echte (value) beleggers' afkerig van momentum beleggen?

1. Momentumaanpak > < Value-aanpak
 - geen diepere kennis vereist
 - momentum: een financiële stoelendans ($\rightarrow$ *greater fool*)
2. Momentumbeleggen = geld verdienen > < Valuebeleggen = nobel doel:
maakt de markt efficiënt

Momentumbeleggers:

- cynische '*me too*' speculanten: vergroten de inefficiëntie
- lifters: weten niet tot waar de rit zal leiden
weten niet met welke wagen (=aandeel) ze zullen meerijden
kiezen enkel de richting

3. Momentumbelegger > < Homo Economicus van de academici

Uitbuiting van psychologische irrationaliteit i.p.v. bijdrage als rationele actor

Momentumbeleggen: eenvoudig maar niet makkelijk

want contra-intuïtief:

Value: 'buy low, sell high' is begrijpbaar: koers keert terug naar waarde

Momentum: buy (high) and sell higher
lijkt op gokken
regels zijn noodzakelijk om te slagen

Momentumbeleggen vraagt om 2 dingen:

1. (bijna) Volledig belegd zijn gedurende sterke bull markets
2. Uit de markt stappen gedurende echte bear markets.

➤ Hoe vind je aandelen/indexen met hoogste momentum?

Zoek de sterkste (land)index, sectorindex

Mogelijkheden:

1. Via website van Chartmill

<http://bit.ly/2CUN4aY>

The screenshot shows the Chartmill Stock Screener interface. At the top, there's a 'Stock Screener Settings' tab. Below it, there are several filter categories: General (2), Technical (0), More Technical (0), Support/Resistance/Channels (0), Flags/Pennants (0), and Fundamental (0). The 'General' tab is active, showing filters for Historical Date (Today), Market Cap (all), Price (Above 5), Average Volume (all), Exchange (Euronext Only), and Index (all). There are also checkboxes for ETF and Industry (all). Below the filters, there's a 'Chart Settings' section with a text input field for a ticker list, a 'Go!' button, and a 'Params' section with a blue '0000FF' button and an 'Add' button. A tooltip提示 says 'Enter a comma or space separated ticker list, press enter or go! when done.' The bottom of the interface shows 'Daily', 'Best Fit', '800px', and 'More' options.

Welke aandelen aankopen?

LT-beleggers: liever gelijkmatige stijgers

Swing Traders: liever volatiele aandelen

Pas bredere kennis TA toe:

- Koers: aan de bovenzijde trendkanaal? Of aan de onderzijde?

- Koers breekt uit een voortzettingspatroon zoals vlag, wimpel, stijgende driehoek

Werkwijze:

- Koop de top-10 aandelen
- Op het geschikt instapmoment: zie TA-dag 2017

op basis van koers + twee Stochasticsgrafieken (5/1 en 22/1)

<http://bit.ly/2B2MiTF>
dia 23 e.v.
Presentatie TA-dag 2017

Werkwijze:

- Koop de top-10 aandelen
- Evalueer na 3 maanden (over recentste 3 maanden)
 - ▶ Behoud de aandelen die ook dán nog in de top-10 staan
 - ▶ Vervang de achterblijvers door nieuwe toppers

Wat zijn de resultaten?

Toegepast op de top-10 van de DAX

DAX in 2017: **+11,4%**

DAX TOP-10: **20,3%** NA aftrek van de kosten (1% per transactie)

op 31/3/17

op 30/6/17

op 30/9/17

Verklaring zwakke prestatie Belgische Top-10?

- Toeval???
- Veel aandelen zaten hoog tegen trendkanaal bij aankoop
- Te weinig gelijkmatig stijgende aandelen (vgl. Lufthansa)

En in **Bear Markets**?

Gebruik een 'marktfilter' om uit de markt te stappen
